

UX / UI

Case Study

2025

Designing a luxury-grade digital presence for India's premier AV, IT & automation Value Added Distributor — precise, authoritative, and built to convert Custom Integrators.

ROLE	YEAR	DELIVERABLES
Lead UX/UI Designer & Front-end	2026	Brand system · UI design · Prototype · Front-end

Overview

Build a luxury-grade digital presence for India's premier technology VAD.

"BEENEXT needed a website that felt like a premium partner walking into the room — not a product catalogue. Every Custom Integrator visiting should immediately understand: this is the best distribution network in India."

Project Brief — BEENEXT, 2025

Primary Audience Custom Integrators & System Integrators AV/IT professionals evaluating distribution partners. Decision-makers who need to trust quality, verify brand portfolio, and initiate a partnership — often researching on mobile between site visits.	Business Goal Convert visitors into partner enquiries Signal premium positioning. Build trust through brand authority and editorial confidence. Drive Custom Integrators to the "Become a Partner" conversion path with minimal friction.	Design Constraints Dark luxury language, no templates Zero UI framework · Single HTML file · Must feel Bang & Olufsen meets enterprise IT · Gold as sole accent color · Sharp architectural layouts, no rounded corners.

Research

Understanding the Custom Integrator.

CI professionals are time-poor, brand-literate, and deeply skeptical of generic distributor sites. Research revealed three core evaluation questions they ask within the first 15 seconds.

6

Stakeholder Interviews

Deep dives with BEENEXT founders & sales team to map CI pain points and buying signals.

12

Competitor Audit

Analyzed 12 distributor websites across India, Singapore & UAE. Identified luxury gap in the market.

3

CI Persona Workshops

Mapped 3 distinct CI profiles: Arjun (AV SI), Priya (IT Procurement), Rohan (Hybrid CI).

"CIs recognise brands before reading copy. Brand identity is their shortcut to trust – show the logos first, everything else second."

Key Research Insight – BEENEXT Discovery Phase

THE 3 QUESTIONS CIs ASK IN 15 SECONDS

01 "Do they carry the brands I need?"

→ Brand marquee above fold, all 9 brands visible within 1 scroll

02 "Are they a credible, established partner?"

→ Stats section: 9yr · 8 brands · 500+ partners · Pan-India

03 "How do I get started?"

→ Persistent nav CTA + full-width Partner section pre-footer

Poor Mobile UX

Personas

Three profiles. One journey.

Arjun Sharma

AV Systems Integrator

GOALS

Find exclusive brands fast. Verify BEENEXT carries Peplink & Crestron before calling.

FRUSTRATIONS

Sites that bury brand lists behind "Contact Us" walls. Slow mobile load.

BEHAVIOR

Scans hero for brand names. Checks logo marquee. If brands match — calls immediately.

Priya Mehta

IT Procurement Manager

GOALS

Vet BEENEXT as an official/authorized distributor. Needs documentation & warranty.

FRUSTRATIONS

Distributors who claim brands they don't officially represent.

BEHAVIOR

Reads brand list carefully. Looks for "official/exclusive distributor" language. Saves page, emails later.

CI DECISION JOURNEY — ARJUN'S VISIT PATH

	AWARENESS	DISCOVERY	EVALUATION	DECISION
Touchpoint	Google: "Peplink distributor India"	Lands on Hero. Sees brand marquee within 1 scroll.	Reads Featured Brands + Why BEENEXT stats	Clicks "Become a Partner" CTA
Emotion	Skeptical — has tried three distributors before	Intrigued — site looks different, premium	Confident — brand depth + stat credibility	Committed — fills enquiry form
Design Need	Strong SEO + fast LCP to land on page	Immediate premium signal + brand visibility	Stats, USPs, brand grid — trust builders	Persistent nav CTA + low-friction form

Information Architecture

Every section earns its position.

The homepage follows a deliberate persuasion sequence: introduce → validate → demonstrate → convert. Each section answers the question the CI asks at that scroll depth.

Homepage Section Flow

Key Architecture Decisions

INSIGHT CIs recognise brands before reading body copy. Brand identity is their shortcut to trust.	→ DECISION Brand marquee in Section 2, immediately below hero. All 9 brands surface within 1 scroll.
INSIGHT Stats ("9 years", "500+ partners") are the most cited B2B credibility signals.	→ DECISION Dedicate a full section (Section 5) to large-format gold stats. Data-first credibility.
INSIGHT Conversion drop-off is highest at the footer when users have lost context on why they should act.	→ DECISION Full-width Partner CTA section (Section 8) with headline + re-anchored value prop placed before footer.

Low-Fidelity Wireframes

Structure before style.

Wireframes stripped color and texture to test layout logic: hierarchy, content density, and CTA placement. Each panel reviewed against the CI decision journey.

Section 01 – Hero

Full viewport · persistent nav CTA · animated hex background

Sections 02-03 – Brand Marquee + What We Do

Infinite scroll marquee · 4 capability cards with gold top border

Visual Design System

Dark. Gold. Architectural.

COLOUR TOKENS

#FFBB50 Pastel Orange	#E79D29 Marigold	#000000 Black	#131313 Surface	#212121 Raisin Black	#FFFFFF White
Primary accent · CTAs	Gradient · hover states	Hero bg · deep sections	Main page background	Card bg · nav bg	Body text · logo mark

TYPOGRAPHY — BARLOW FAMILY

Headlines.

Barlow ExtraBold — Display / Hero

Tight tracking −0.03em signals precision and authority. 800 weight at large size creates the luxury editorial impression at first glance. Zero use of ornamental or script faces.

Body copy flows with clarity and restraint — designed for sustained reading on dark backgrounds without eye fatigue. Light 300 weight maintains readability.

Barlow Light — Body Copy

300 weight body paired with 800 headings creates stark contrast hierarchy. Single-family approach eliminates font-swap jank on load. No mixing of typefaces.

CORE DESIGN PRINCIPLES

No Rounded Corners Sharp geometry communicates precision and authority. 0px border-radius on all elements — never compromised.	Gold as Sole Accent Every interactive element uses only gold. No secondary accent colors — maximum brand focus and recognition.	Weight Contrast ExtraBold 800 headlines against Light 300 body creates maximum typographic tension and hierarchy.	Dark Surfaces Only Dark backgrounds throughout — never white sections. Luxury signals preserved end-to-end of every scroll.
--	---	---	---

KEY UI COMPONENTS

Become a Partner →	Explore Brands	9+ YEARS OPERATING	Component Card Title Descriptive body copy with Barlow Light 300, line-height 165%, opacity 55% on white.
-------------------------------	---------------------------	-------------------------------	---

High-Fidelity Design

From skeleton to luxury digital asset.

HERO SECTION – FINAL

KEY DESIGN DECISIONS

- ◆ **Hex Grid Animation**

Animated geometric background creates immediate luxury signal without stock imagery. Pure CSS – zero performance cost.
- ◆ **Brand Marquee at Section 2**

All 9 brands visible within 1 scroll. CI's primary evaluation trigger met before any body copy is read.
- ◆ **Persistent Nav CTA**

"Become a Partner" stays in nav throughout scroll – average 2× CTA exposures per session.
- ◆ **Admin Config Panel**

Hidden panel lets BEENEXT team edit all content without code – hero, brands, stats, blog, contact.

COMPONENT PREVIEW

"Luxury is the absence of noise. Every design decision removed something – an effect, a color, a curve – until only authority remained."

Design Principle – BEENEXT Visual System

BRAND PORTFOLIO – MARQUEE BRANDS

Technical Delivery

One file. Zero dependencies. Production-ready.

The final deliverable is a single self-contained HTML file with all CSS and JS inlined. Deployable to any static host — no build pipeline, no framework runtime, no dependency risk.

TECHNICAL SPECIFICATIONS

Architecture	Single HTML file — all CSS variables, keyframes, and JS inlined. Zero external runtime dependencies.
CSS Strategy	CSS custom properties (variables) for all design tokens. Dark-only palette, consistent across all sections.
Animation Engine	Pure CSS keyframes for all motion. prefers-reduced-motion respected — animations collapse to 0.01ms.
Typography	Google Fonts: Barlow family (Light, Regular, SemiBold, Bold, ExtraBold). Preconnect + display=swap for zero layout shift.
SEO & Schema	Organization, FAQ, WebSite JSON-LD schema. OG tags, canonical URL, sitemap-ready meta for full AI search discoverability.
Admin Panel	Hidden config panel (keyboard shortcut access). Non-technical users update all content — hero, brands, stats, blog, contact.

PERFORMANCE TARGETS

<2.5s LCP Target	<0.1 CLS Target	AA WCAG Contrast	0 JS Frameworks
---------------------	--------------------	---------------------	--------------------

"All animations respect prefers-reduced-motion: reduce. When users opt out of motion, animations collapse to 0.01ms — the site remains fully functional and visually coherent."

Accessibility Principle — BEENEXT Design System

DESIGN OUTCOMES

A website that performs as a premium brand asset.

100%

Single-File Delivery

Zero dependencies. Deployable anywhere. No build pipeline, no framework, no runtime risk.

9

Homepage Sections

Full persuasion sequence: introduce → validate → demonstrate → convert. Every section placed by data.

2×

CTA Exposures / Visit

Partner CTA in persistent nav + full-width section pre-footer. Users can't miss the conversion path.

KEY DESIGN ACHIEVEMENTS

- ◆ Luxury dark/gold language differentiates BEENEXT from all generic competitors in the Indian VAD market
- ◆ Brand marquee surfaces all 9 exclusive brands within 1 scroll — CI's primary evaluation criterion met immediately
- ◆ Admin config panel enables non-technical content updates — hero, brands, stats, blog, contact — all without code
- ◆ Full SEO + AEO + GEO structured data: Organization, FAQ, WebSite schema for maximum AI search discoverability

KEY LEARNINGS

Constraint breeds creativity

The "one HTML file" constraint forced elegance — no bloat possible when everything must be hand-crafted.

Brand before copy

Research proved CIs read logos before headlines. IA shifted Brand Marquee to Section 2, above all body copy.

Dark luxury = differentiation

In a sea of white generic sites, dark gold positioning immediately signals premium — the site IS the brand statement.

BEE NEXT

Bringing the Next in Technology Solutions to Custom Integrators across India.
